

Curcuma longa extract
CURCUMAN[®]

Standardized extract of Curcuma longa (Turmeric)

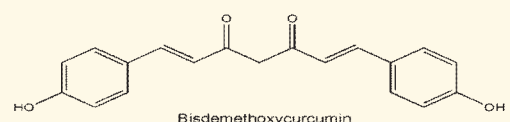

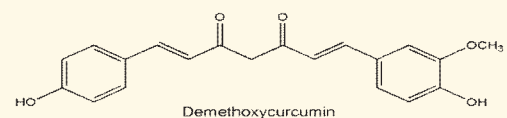

CUCRCUMAN[®] is a standardized extract prepared from the rhizomes of Curcuma longa, a branded product of Manipal Natural, India.

Curcumin is the principal active ingredient in turmeric.

- **CUCRCUMAN**[®] is a chemically standardized for the active components (curcuminoids) by HPLC.
- Manufactured in a GMP and ISO 9001

2000 & ISO 22000 certified manufacturing facility.

- The product is Kosher and Halal certified.

Benefits of CURCUMAN®

Microencapsulated Curcumin has better bioavailability compared with 95% pure curcuminoids¹. Improved bioavailability is important for higher efficacy of the curcuminoids. The water dispersible curcuminoids preparations (10% & 30%), especially at a lower dosage, may be an ideal candidate to have the benefits of curcumin. Curcumin WD easily disperses in aqueous solutions and makes it suitable for best ingredient of choice for herbal drink mix and beverages.

- Promote good digestion
- Support lungs health
- Fight against Alzheimer disease
- Deals with arthritis
- Helps improving mental health
- Helps in weight loss.
